**Inhalation** If inhaled, remove from contaminated area. Apply artificial respiration if not breathing

**Advice to Doctor** Treat symptomatically as for strong alkaline material.

## 4. FIRE-FIGHTING MEASURES

---

### **Fire/Explosion Hazard:**

Chlorinated Detergent does not burn. Fire or strong heat will produce irritating, poisonous or corrosive gases. Containers may explode when heated. Some may ignite combustibles (wood, paper, clothing, etc.) Contact with metals may produce flammable hydrogen gas.

### **Fire Extinguishing media:**

Small fire: Use dry chemical, CO<sub>2</sub> or water spray.

Large fire: Use water spray, fog or foam. Do NOT use water jets. If safe to do so, move undamaged containers from the fire area. Cool containers with flooding quantities of water until well after the fire is out. Avoid getting water inside the containers.

### **Fire Fighter's PPE:**

Wear SCBA and chemical splash suit. Fully encapsulating, gas-tight suits should be worn for maximum protection. Structural firefighter's uniform is NOT effective for this material.

**Hazardous Reactions:** Reacts vigorously with acids producing dangerous levels of gaseous chlorine. May yield toxic fumes if involved in a fire.

## 5. ACCIDENTAL RELEASE MEASURES

---

Clean up all spills immediately.

Eliminate all ignition sources (no smoking or flames) within at least 50m.

Avoid contact with skin and eyes.

Do not touch or walk through this product.

Stop leak if safe to do so.

Prevent entry into waterways, drains or confined areas.

Cover with DRY earth, sand or other non-combustible absorbent followed by plastic sheet to minimize spreading or contact with rain.

Do not let water run into containers.

## 6. HANDLING AND STORAGE

---

### **Storage and Transport:**

Store in a cool, dry place that is well ventilated and away from foodstuff containers.

Direct sunlight should be avoided.

### **Stability:**

Stable. However, heat, light, contamination with acids or contact with metal surfaces may promote the formation of toxic chlorine gas.

### **Incompatibility**

Materials to avoid for purposes of transport, handling and storage only): Avoid storage with acids, oxidising agents, reducing agents, metals and metallic salts.

Incompatible with amines, ammonium salts, aziridine, methanol and phenyl acetonitrile.

Class 8

## 7. EXPOSURE CONTROLS/PERSONAL PROTECTION

---

**Exposure Standards:** None assigned for mixture.

### **Atmospheric Contaminant Exposure Standard for:**

Chlorine: CAS No: 7782-50-5 TWA = 1 ppm (3 mg/cu.m)

STEL = Peak limitation same as TWA.

Sodium hydroxide: CAS No: 1310-73-2 TWA = 2 mg/cu.m

### **Engineering Controls:**

Mechanical ventilation: not required under normal conditions, but local exhaust ventilation should be used to control any air contaminants to within the Exposure Standards.

**Personal Protection:**

Gloves - Wear rubber, neoprene or nitrile gloves.  
Note - Resistance of glove materials can vary. Evaluate resistance under conditions of use and maintain PPE carefully.

**Eye protection** – Safety glasses should be worn.

**Respiratory** – If inhalation risk exists, a suitable cartridge type Respirator should be worn.

**Other** – Protective overalls are desirable. An eyewash unit should be available.
